Test Results For Metals in Aerosol

| Brand / Description | Arsenic ug/100 puffs | Cadmium ug/100 puffs | Chromium ug/100 puffs | Lead ug/100 puffs | Nickel ug/100 puffs | Pass/Fail |
|---------------------|-------------------------|-------------------------|--------------------------|----------------------|------------------------|-----------|
| Pur Basecamp | 0.00000 | 0.00000 | 0.00000 | 0.00000 | 0.22556 | P |
| Permissible Limit | 1.00 | 1.00 | 1.50 | 2.50 | 2.50 | |

Samples submitted above have been tested and evaluated against the permissible limits from the target values for elements emitted in 100 puffs (µg). This is in accordance with AFNOR's Electronic cigarettes and e-liquids -- Part 3: Requirements and test methods for emissions (20 July 2016).

Enthalpy Analytical is an A2LA Accredited laboratory and meets the requirements of ISO/IEC 17025-2017 "General Requirements for the Competence of Testing and Calibration Laboratories" and any additional program requirements in the identified field of testing. Testing and calibration laboratories that comply with this International Standard also operate in accordance with ISO 9001.
